

Exterior Insulations

Sustainable – energy-saving –
highly insulating – efficient

Convection and radiation lead to high energy losses

Your energy costs can be significantly reduced by efficient exterior insulation.
We will be happy to advise you on the selection of the optimal insulation solution.

Optimal exterior insulation offers the following advantages:

- Shorter heat-up time
- Even temperature distribution
- Constant product quality
- Energy saving
- Reduced control and energy efforts for temperature control systems
- Protection from burns and reduction of heat stress for workers

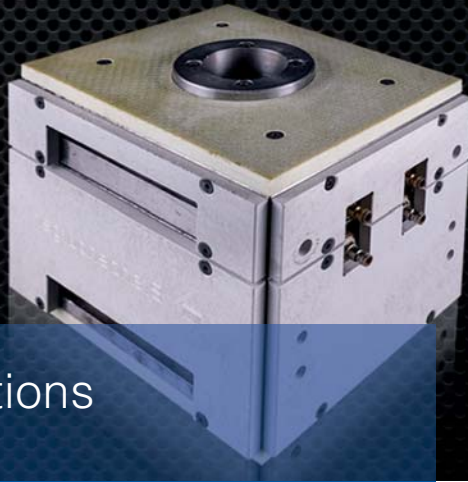

Our joint topics:

- Feasibility
- Potential energy savings
- Payback period
- Material selection

Brandenburger

Exterior Insulations

Product range

XGD® 15

High insulating effect due to inside air chambers - easy to clean and smooth exterior
Long-term temperature resistance up to 200°C

S4000® A

Innovative, lightweight design - excellent insulating effect
Long-term temperature resistance up to 230°C

BRA-GLA® MP

High insulating effect due to inside air chambers - resistant to impact and media loads
Long-term temperature resistance up to 300°C

BRA-FLEX®

Tailor-made, flexible insulation solution - excellent protection against burns
Long-term temperature resistance up to 1000°C

BRA-FLEX® Protect

Flexible insulation solution for surfaces and standard parts (hose insulation)
Long-term temperature resistance up to 250°C

XGD® 10

Dimensionally stable, closed-cell insulation material with excellent insulating effect
Long-term temperature resistance up to 180°C

BRA-GLA® KA

Innovative, lightweight design - excellent insulating effect
Long-term temperature resistance up to 450°C
