Our consultation

The right insulation solution

A niche in industry - a mission for us.

In-house production and professional processing offer planning reliability at the highest level.

How to pick the perfect insulation plate for you

- Joint discussion for optimised solutions
- Calculation of required installation space for the insulation (thickness)
- Fulfilment of technical requirements including economic efficiency
- Troubleshooting for your production problems
- Find energy saving potentials with efficiency calculations

Manufacturing of our insulation plates (drilling, milling, turning, grinding, ...)

- Cut to size plates without machining
- Ready-to-install parts according to customer specifications (drawing / sketch)
- Feasibility checks
- Single part and serial production

Insulation Solutions from Brandenburger

Our services:

- Your expert contact for all questions regarding insulation
- Support during project and design phase
- Consulting for existing applications (review, optimization, troubleshooting)
- Identification of efficiency or heat transfer calculations
- Own R&D - own production - own manufacturing according to design specifications

We are happy to support you – just get in contact with us!
